

8 Courses

**Introduction to  
Cybersecurity Tools & Cyber  
Attacks**

**Cybersecurity Roles,  
Processes & Operating  
System Security**

**Cybersecurity Compliance  
Framework & System  
Administration**

**Network Security &  
Database Vulnerabilities**

**Penetration Testing,  
Incident Response and  
Forensics**

**Cyber Threat Intelligence**

**Cybersecurity Capstone:  
Breach Response Case  
Studies**

**IBM Cybersecurity Analyst  
Assessment**

Oct 1, 2022

**Sean Nelson**

has successfully completed the online, non-credit Professional  
Certificate

## IBM Cybersecurity Analyst

In this Professional Certificate, learners developed and honed essential knowledge and skills to enter today's dynamic cybersecurity workforce. Learners developed knowledge of cybersecurity analyst tools including data protection; endpoint protection; SIEM; and systems and network fundamentals; acquired knowledge around key compliance and threat intelligence topics important in today's cybersecurity landscape; gained skills for incident responses and forensics. The learner's knowledge and skills were tested through multiple assessments throughout the courses, a real-world breach case study and several hands on virtual labs. The learner also achieved a passing score on a final assessment course covering all content from the previous seven courses.

*Cecilia Ryzhik*

Program Manager, IBM  
Security Learning  
Services

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
